

Let Our Antimicrobial Materials Support the Production of Antibacterial Products

Many substances in nature have good bactericidal or anti-microbial functions. At present, antibacterial materials are more of a new type of functional material that can inhibit or kill surface bacteria by adding certain antibacterial substances.

Infectious disease management is increasing in recent years. Especially during this COVID-19 pandemic, Matexcel provides **antimicrobial functional powder**, **antimicrobial solution** and **antimicrobial fibers** to support the production of protective products.

Advantage of our antimicrobial material:

- Highly stable over long period of time;
- Easily and inexpensively synthesized;
- Not decomposing or emitting toxic products;
- Water-insoluble (for disinfection of water);
- Broad-spectrum of antimicrobial activity;
- Non-toxic and non-irritating.

80 Orville Dr. Suite 100-10131, Bohemia, NY 11716
